

USDT (ERC20) USDT (TRC20)

A Tether Mixer, also known as a Tether Tumbler is an online service helping tether owners to regain privacy over there USDT

The best way to buy cryptocurrencies such as Tethers is through a so-called "Exchange". Exchange would be used for Tether selling their assets and after verifying their identity. In providing this exchange with a official ID card.

The process described as a security feature, is actually a trick from the governments forcing these exchanges to collect and share their personal information with them.

Since that time and because the aforementioned can used by Tether to public, avoid having your ID card for sale to catch your wallet and how their own changes to other your funds.

However, there is a high way to purchase your crypto privacy. It's called a Tether [USDT Mixer](#).

How does tether mixer work?

Tether Mixer uses different address (private and semi) in two steps.

They will use one of their liquidity pool to receive your USDT on [ERC20](#) or [TRC20](#) (depending on your choice).

Then they will use another of their liquidity pool to provide you with other [USDT](#) on [ERC20](#) or [TRC20](#) (depending on your choice).

Therefore, the value you will receive on your new wallet after this mixing procedure will not be related to your original transaction.
