|  | E-Mail Datenschutz                 | Achtung! Es wurde mindestens eine E-Mail Adresse im Klartext auf Ihrer Webseite gefunden. Benutzen Sie <a href="#">dieses kostenlose Werkzeug</a> um E-Mail Adressen vor SPAM zu schützen.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
|  | Veraltetes HTML                    | Sehr gut! Sie verwenden aktuelle HTML Tags in Ihrem Webseitenquelltext.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |
|  | Tipps zur Webseitengeschwindigkeit | <div> Sehr gut, denn Ihre Webseite benutzt keine verschachtelten Tabellen.</div> <div> Schlecht, denn es wurden CSS-Angaben in HTML-Elementen entdeckt. Diese Angaben sollten in ein entsprechendes CSS-Stylesheet verlagert werden.</div> <div> Gut, denn Ihre Webseite enthält nur wenig CSS-Dateien.</div> <div> Nicht so gut, denn Ihre Webseite enthält viele Javascript-Dateien (mehr als 6).</div> <div> Gut! Sie nutzen die Vorteile von gzip.</div> |
